

The WORKSHOP on the DEVELOPMENT of the PHOTOVOLTAICS in the EU NEW MEMBER STATES

International Congress Center Munich, Room 3, 08 June 2011, 08.45–13.30

The Workshop on the “**Development of Photovoltaics in the European Union New Member States**” will be a joint event for members of Parliaments and Governments, energy regulation authorities, operators and distributors from 12 EU NMS (Bulgaria, Cyprus, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Romania, Slovakia, Slovenia and, representatives of world’s photovoltaic industry, R&D institutions and consultant companies.

The Workshop on the economic, policy, financial, etc. aspects of PV will be side event of Intersolar Trade Fair Munich. The scope of this Workshop will pave the way for wider endorsement of the PV technology’s potential, raise interest, awareness and competence of PV applications, assuring right place of PV in the National Action Plans for RES, overcoming the prejudice towards grid-connected PV installations, understanding how to handle PV with balanced and logical decisions without preconceived notions and/or based on misleading information.

The involvement of institutions/companies (EPIA, Sharp, Fraunhofer ISE Freiburg, BSW, Schott Solar (tbc), First Solar (tbc), SMA (tbc) and others) with the experience in similar initiatives could help transfer know-how and information especially on the development of strategies and support to national authorities; to envisage advising tasks on PV market issues and in particular on national action plans and support mechanisms.

The Workshop is organized in frame of the project **PV-NMS-NET: Development of Photovoltaics in the EU New Member States**. The project is funded by EACI under the **Intelligent Energy Europe Framework Program**.

The attendance in the Workshop is only by personal invitation.

The registration fee is 150 EUR.
